REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest an electrode having two spaced apart opposing plates having a material reactive to an electrolyte wherein an inner chamber is formed by said plates and wherein at least one of said plates has an aperture extending there through. An electrode having a plurality of spaced apart planar section having the peripherally joined edges so as to define an interior chamber between the planar sections and which planar sections are formed from an active material that chemically supports battery charge generation and having a plurality of apertures through at least one of the planar sections is also not taught or suggested. A method of increasing chemical reaction efficiency for an electrode assembly configured for use in a liquid electrolyte battery using an electrode which has a chamber formed within a first active material and inserting a highly reactive second material within the chamber to support charge generation within the liquid electrolyte battery is also not taught or suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
